

Web-сервис для конвертирования рукописных конспектов в \LaTeX -документ

Т. Гадаев, Г. Моргачев, Е. Шульгин

Московский физико-технический институт
Факультет управления и прикладной математики

Курс: Основы объектно ориентированного программирования
(лабораторные, А. И. Панов)/Группа 571, весна 2017

- Web-сервис для оцифровки конспектов и последующего быстрого редактирования
- Распознавание текста, формул и графиков с помощью нейросетевых технологий
- Совместное редактирование

CROHME

Data & Tools

Tasks 2014

The current version of CROHME is being organized along with [ICFHR 2014](#). Look at the [Call for Participation](#).

Data and Tools

All data and tools provided here are freely available only for research purpose without any commercial use.

Description of Training and Test Data

Training and test data will be given in XML (more specifically in InkML) format. Separate grammar will be provided to understand the structure of the XML data. [Click here to know more about the data file format](#).

[The CROHME package](#) provides training and test data from the competitions CROHME 2011, 2012 and 2013. Furthermore, thanks to the participants' authorization, we are allowed to distribute the results files from the majority of the submitted systems in 2012. Here is the description of all data directories:

- **CROHME2011_data** : all data from the CROHME 2011 competition:
 - **CROHME_test** : inkml test files without ground truth
 - **CROHME_testGT** : inkml test files with ground truth
 - **CROHME_train** : inkml train files with ground truth
 - **gram** : xml grammars and symbol lists for parts I and II
- **CROHME2012_data** : all data from the CROHME 2012 competition:
 - **testData** : inkml test files without ground truth
 - **testDataGT** : inkml test files with ground truth
 - **trainData** : inkml train files with ground truth
 - **gram** : xml grammars and symbol lists for parts I, II and III
 - **lists** : lists of inkml files and latex expressions for parts I, II and III
